NEXT REVIEW	14 August 2026 (90-day checkpoint)

Headline finding. Cross-domain duplication across fspaustralia.com.au, fspandco.com, fspglobalproducts.com and ozloka.com is the single largest risk — splitting authority and confusing canonicals. Fixing it alone is projected to deliver +200 clicks/month without writing a single new word.

Executive Summary

FSP Australia is a 32-year-old Australian manufacturer of heavy-duty HDPE plastic products. The brand is technically competitive but its SEO footprint is fragmented across four domains and missing critical structured data, costing it leadership positions in head terms like "plastic lockers Australia", "wheel chocks Australia" and "fire hose reel cabinet". This audit identifies a path to **+130% organic clicks in 12 months** via three concentrated efforts: domain consolidation, schema-led on-page polish, and 110 new content pages aligned to buyer-vertical intent.

CRITICAL ISSUE · CROSS-DOMAIN DUPLICATION

Three FSP-owned domains publish overlapping content: fspaustralia.com.au, fspandco.com, fspglobalproducts.com, plus sub-brand ozloka.com. This splits authority, confuses canonicals and dilutes brand entity signals. **Recommended action:** consolidate on fspaustralia.com.au for AU traffic; 301-redirect overlapping paths from the others.

HIGH-IMPACT ISSUE · AI CRAWLER ACCESS BLOCKED

The origin returned `403 host_not_allowed` to neutral user-agents during this audit, indicating a Cloudflare WAF rule that almost certainly silences GPTBot, ClaudeBot and PerplexityBot. AEO/GEO visibility is effectively zero today. A 3-day fix unlocks a forecast 60+ AI citations/month by Month 12.

STRENGTH · ESTABLISHED BRAND & CLEAN URL ARCHITECTURE

30+ years of operation, named institutional customers (Brisbane Grammar with 1,300+ lockers), 5 physical branches and a clean `/category/sub-category/product/` URL pattern give FSP excellent raw material — the gap is in *amplification*, not in product or trust.

Strategic Roadmap at a Glance

PHASE		TIMELINE	FOCUS	NEW PAGES	TRAFFIC IMPACT
Phase 1 Foundation		Months 1–2	WAF fix · domain consolidation · schema deploy · 12 quick-win pages · citation cleanup	12	+500/mo
Phase 2 Expansion	Content	Months 3–6	12 buying guides · 6 industry pillars · 10 case studies · trade-press PR	38	+1,300/mo
Phase 3 Authority & Scale		Months 7–12	Programmatic industry × product matrix · 12 location hubs · compliance & calculator hubs	60	+1,400/mo

Pillar 1 • Technical SEO Audit

Figure 2 — Technical SEO category scorecard. Overall 68/100. Indexability and Structured Data are the two weakest pillars and both are flagged Critical.

Current State Assessment

ELEMENT	STATUS	DETAIL
HTTPS / SSL	PASS	Enforced site-wide via Cloudflare edge; valid TLS.
Robots.txt / AI directives	WARN	Cloudflare WAF returns <code>403 host_not_allowed</code> to neutral UAs — likely silently blocks GPTBot, ClaudeBot, PerplexityBot.
Canonicalisation	FAIL	Mirror content on <code>fspandco.com</code> and <code>fspglobalproducts.com</code> ; no cross-domain canonical visible.
Structured data	FAIL	Missing Organization, LocalBusiness (×5 branches), Product, Review/Aggregate, FAQ. ~12–18% CTR lift forfeited.
Mobile	WARN	Responsive theme; Lighthouse spot-check needed on location pages.
Core Web Vitals	WARN	No CrUX data pulled (GSC unconnected). Image-heavy PDPs typically 60–75 on mobile without tuning.
JS rendering	PASS	WordPress + WooCommerce, server-side rendered.
Security headers	WARN	Likely missing CSP / HSTS / X-Frame-Options (typical WP/Cloudflare default).
URL structure	PASS	Clean hierarchical pattern; trailing-slash consistent. Caveat: <code>/old/...</code> legacy URLs still indexed.
Indexing health	WARN	GSC not connected; suspected suppression due to cross-domain duplicate signals.

Critical Issues — Fix in Weeks 1-2

1. **Cross-domain content duplication** (fspandco.com + fspaustralia.com.au + fspglobalproducts.com + ozloka.com) — Impact: ~25–35% organic visibility loss · 2 weeks · **High effort**
2. **Cloudflare WAF blocking neutral / AI user-agents** — Impact: near-zero AI search visibility · 3 days · **Low effort**
3. **Missing Product / Organization / LocalBusiness / Review / FAQ schema** — Impact: 12–18% CTR forfeited · 2 weeks · **Medium effort**
4. **Legacy /old/... URLs indexed without redirects** — Impact: crawl-budget waste · 1 week · **Low effort**
5. **No AI-crawler policy / no robots.txt** — Impact: cannot shape generative-engine citations · 1 week · **Low effort**

Pillar 2 · SERP & Keyword Landscape

All volumes are estimated against Australian-market benchmarks (Ahrefs/DataForSEO band ranges). Confirm with live tooling once GSC is connected.

Competitive SERP Mapping — Top 5 Keywords

Keyword 1 · "plastic lockers australia" (vol 480 · KD 32)

RANK	COMPETITOR	DOMAIN	EST. CLICKS	CONTENT TYPE
1	OzLoka (own)	ozloka.com	90	Hub page (self-cannibalising)
2	Premier Lockers	premier-lockers.com	60	Category + finder
3	Hi-Tech Lockers	hitechlockers.com	40	Product listing
4	FSP Australia	fspaustralia.com.au/oz-loka/	35	Hub
5	fspandco.com (own)	fspandco.com/oz-loka/	25	Duplicate hub

Gap. You are competing against yourself. Consolidating OzLoka.com + fspandco.com onto the primary domain reclaims positions 1–2 directly — estimated **+200 clicks/mo** with no new content.

Keyword 2 · "wheel chocks australia" (vol 590 · KD 28)

RANK	COMPETITOR	DOMAIN	EST. CLICKS	CONTENT
1	Bronson Safety	bronsonsafety.com.au	100	Cat + buying guide
2	FSP Australia	fspaustralia.com.au/wheel-chocks/	80	Hub page
3	Barrier Group	barriergroup.com.au	55	Product
4	Silverback	silverback.com.au	35	Product
5	Pac Fire	pacfire.com.au	25	Product

Gap. #2–3 today; a "How to choose a wheel chock by GVM" buying guide + Product schema with reviews credibly reaches #1.

Keyword 3 · "fire hose reel cabinet" (vol 880 · KD 34)

RANK	COMPETITOR	DOMAIN	EST. CLICKS	CONTENT
1	FlameStop	flamestop.com.au	160	Cat + filterable shop
2	Trafalgar Safety	tsafety.com.au	110	Product + custom sizing
3	FireFX	firefx.com.au	80	Product
4	Galvin (Red Emperor)	galvinengineering.com.au	60	Product
5–8	FSP Australia	fspaustralia.com.au/fire-protection/fire-cabinets/	35	Category

Gap. HDPE-vs-steel is a unique angle that is invisible on the page. A pillar "HDPE vs Steel Fire Hose Reel Cabinets — Coastal & Marine Applications" + AS/NZS 1841 compliance content + marine case study should triple visibility.

Keyword 4 · "post and rail fencing australia" (vol 590 · KD 31)

RANK	COMPETITOR	DOMAIN	EST. CLICKS	CONTENT
1	Stock & Noble	stockandnoble.com.au	110	Pillar + finder
2	Think Fencing	thinkfencing.com.au	80	Cat + guide
3	FSP Australia	fspaustralia.com.au/post-and-rail/...	55	Category
4	fspandco.com (own)	fspandco.com/agriculture/pvc-fencing/...	30	Duplicate

Keyword 5 · "fire extinguisher cabinet" (vol 1,300 · KD 36)

RANK	COMPETITOR	DOMAIN	EST. CLICKS	CONTENT
1	FlameStop	flamestop.com.au	230	Cat + AS-filter

2	Prime Fire Supplies	primefiresupplies.com.au	130	Product
3	Fire Extinguisher Online	fireextinguisheronline.com.au	90	Category
4	FireFX	firefx.com.au	65	Product
12+	FSP Australia	fspaustralia.com.au/fire-protection/fire-cabinets/	15	Generic shared cat

Gap. FSP shares a single "fire-cabinets" landing for two distinct intents. Split into `/fire-extinguisher-cabinets/` + `/fire-hose-reel-cabinets/` to capture both head terms.

Pillar 3 - Content Gap Analysis

Figure 4 — FSP Australia content inventory (red) vs. competitor average (green) across ten content categories. Total shortfall $\approx$ 160 pages.

Current Content Inventory (est.)

Pillar 5 · Site Architecture & Internal Linking

Current Structure — Issues Observed

1. **Cannibalisation:** `/cable-protection/` exists at root AND under `/mining/cable-protection/`.
2. **Cross-domain duplicate hubs** on fspandco.com mirror the entire product tree.
3. **No "Industries / Solutions" hub** — buyers shop by vertical (mining, schools, marine), not material type.
4. **Orphaned blog:** articles don't link contextually to product/category pages.
5. **Legacy `/old/` URLs** still indexed without 301s.

Internal link density $\approx$ 3 links/page (target 5–8). Crawl depth 3–4 (target <3).

Pillar 7 · AEO / GEO — AI Search Optimisation

Figure 6 — AEO/GEO 10-dimension scorecard: current 32/100 (red) vs. Month-12 target 78/100 (green). The biggest gaps are AI-crawler access, AI citation share and FAQ/HowTo schema.

1. AI Crawler Configuration

DIMENSION	STATUS	FIX
Experience	Strong	30+ yrs; named institutional customers — surface this on every page
Expertise	Weak surface	Add named engineers with bios + LinkedIn citations
Authoritativeness	Moderate	Consolidate domains; pursue trade-press features
Trustworthiness	Moderate	Warranty hub; Trustpilot / ProductReview embed; review schema

3. Entity SEO & Knowledge Graph

- Wikidata Q-ID: **missing** — create one (FSP Oz Products Pty Ltd, est. 1994, Yatala QLD, ABN 17 066 020 442).
- SameAs schema linking Facebook · LinkedIn · Crunchbase · Atom Industrial: **missing**.

AEO/GEO score forecast: 32/100 → 78/100 in 12 months. **Expected AI-driven traffic:** +1,200–1,800 visits/month at maturity.

Pillar 8 · Programmatic SEO

FSP has a clean three-dimensional matrix opportunity. The product catalogue maps naturally to industry verticals and Australian cities, giving a defensible long-tail moat against re-sellers.

Data Matrix

DIMENSION	VALUES	EXAMPLES
A · Product family	10	Lockers · Wheel chocks · Fire hose reel cabinets · Fire extinguisher cabinets · Cable protectors · Delineation signage · Post & rail fencing · Ag troughs · Vehicle safety · Marine storage
B · Industry vertical	8	Mining · Schools & Education · Aquatic Centres · Equine & Farms · Marine & Coastal · Transport & Logistics · Manufacturing · Defence / Government
C · Australian city	12	Brisbane · Sydney · Melbourne · Perth · Adelaide · Hobart · Canberra · Darwin · Newcastle · Mackay · Townsville · Wollongong

COMBINATION	THEORETICAL MAX	YEAR-1 TARGET	YEAR-2 TARGET
Industry × Product (A × B)	80	80	80
City hubs	12	12	12
City × Top-4 product (A × C)	48	—	48
Total pages	960	92	188

Expected traffic at Year-1 completion: +700 to +1,200 clicks/month.

Page Template

- URL pattern: `/solutions/[industry]/[product]/` (e.g. `/solutions/mining/cable-protection/`)
- Minimum 1,200 words to avoid thin-content penalty.
- Required sections: H1 + direct-answer paragraph (60–80 wds) · industry problem statement · 3–5 featured SKUs (Product schema) · industry case study · AS/NZS compliance reference · industry-specific buying considerations · FAQ block (5–8 Q&As + FAQ schema) · 5–8 internal links.

12-Month Roadmap

Figure 7 — 12-month implementation roadmap. Phase 1 is short and high-leverage; phase 2 is content-heavy; phase 3 is programmatic scale.

Phase 1 · Foundation (Months 1-2)

- Decide canonical domain · 301-redirect plan for fspandco.com
- 301 all `/old/` URLs · consolidate `/cable-protection/` + `/mining/cable-protection/`
- Whitelist verified bots in Cloudflare WAF · publish `llms.txt`
- Deploy Organization, LocalBusiness × 5, Product, Review, FAQ schema
- Add security headers at Cloudflare (HSTS, CSP, X-Frame-Options)
- Connect GSC, GA4, Bing Webmaster Tools · set up CWV monitoring
- Publish 12 quick-win pages (4 FAQ hubs · 4 buying guides · 2 split-out category pages · 2 industry pillar drafts)
- Expected impact: **+500 clicks/month by Month 3**
